

# PORTABLE DEHUMIDIFIER

**WELTEM**

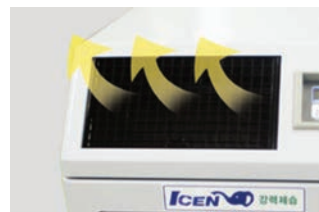

ISO 9001, ISO 14001

## CAG Cooling's Dehumidifier will fix the serious problems caused by Moisture Infiltration

**CAG Cooling** breaks all performance barriers with our Dehumidifier that removes more water than any other Dehumidifier in its category. CAG Cooling have developed Radical Crossflow Technology to maximize energy operation. Built-in sensors constantly monitor the real time performance information to automatically calculate ideal operating parameters.

### Product Features

- High dehumidification capacity per day is rated at 120 L/@30°C RH 80%
- Condensate pump installed as standard.
- Digital controller: ON/OFF timer function with error message display function.
- Sturdy castors made of anti-corrosion high strength materials.
- Auto humidity adjustment function allows the dehumidifier to adapt to the best humidity level automatically.

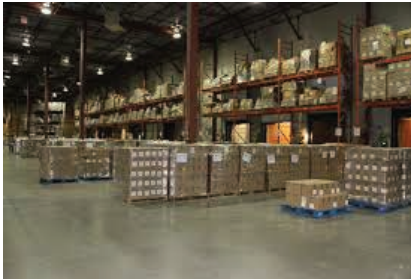

Power Supply	115V/60Hz
Power Consumption	1.2kW
Current Consumption	10.66A
Operating conditions	5°C to 35°C / 41°F to 95°F
Dehumid Capacity per day	120L/Per Day
Refreigerant	R410A
Weight	64kg(141Lbs)
Size(WxDxH)mm/Inches	551x607x839 / 22"x24"x33"

## Dehumidifier Applications

The images below are some examples of applications where CAG Cooling's Dehumidifier can be used. Other applications include, but not limited to, are: underground spaces, heat treated rooms, boiler rooms, auto repair shops, ship building and industrial work yards, plastic injection, factories and machine shops.

Warehouses

Textile Mills

Painting

Restaurant Kitchens

Flooded or Damp Basements

Food Processing Plants

Boiler Rooms

Casting Foundry
